

Procedures to apply a non-spill snap cap on your water dispenser:

1. Replace an original cap by a non-spill snap cap and snap it down firmly over a bottle neck. You don't need tear-off a non-spill snap cap.
2. Remove the label on the top of a non-spill snap cap and turn the bottle onto your water dispenser.
3. Your water dispenser should be equipped a top with non-spill water feature (refer the picture) to penetrate the bottle top. After then, water flows into your dispenser from a water bottle.
4. If your dispenser does not have the feature equipped, please remove a small cap in the middle of a non-spill snap cap before turn the bottle onto your water dispenser.
